Summary

With 15 years of experience as a Front-End Developer at Amazon, I have contributed to enhancing Amazon's e-commerce platform. My expertise includes Java, Scala, HTML, CSS, JavaScript, and frameworks like React. I have focused on delivering responsive, user-centric web applications that improve user engagement and conversion rates. I am now eager to apply my skills and experience to new challenges in a dynamic environment.

Key Achievements

Boosted Website Speed

Increased website speed by 15% through optimization of front-end code and framework migration.

Enhanced Customer Transactions

Implemented payment portal resulting in 20% increase in completed transactions within first month

Optimized Latency Data

Reduced latency in Indian cities by 10% using dashboard analytics and strategic updates

Streamlined Data Processing

Achieved 18% efficiency in data processing by developing a new job outsourcing platform.

Built Entire Front End From Scratch

Built several website app from scratch from design to testing, pipeline with dashboard
