Research Proposal: A Study on Safety in Fire Work Industry

My area of research study aims at exploring the safety of the employees in the fireworks. Fireworks industry is a very flourishing field in India. But in this industry, the employees are not given adequate safety measures for their safe working. In fireworks the employees have lot of risk on their safety and well being. There has been lot of health afflictions due to air quality. In fireworks industry, safety is most important for the employees.

In fireworks industry lot of fire disaster is happening this is a time to identify the safety materials and well-being of the employees. If the factory gives safety to the employees they will work peacefully in the workplace. It will affect the employees health and their well-being also. Many health issues will come because of the safety issues in fireworks and it will affect their livelihood also.

It is therefore essential to identify and examine the causes of industrial accidents and take steps to control them. Industrial safety engineering is one field which deals with design of efficient work place, equipment and industrial layout design. Improper handling of fireworks could lead to all sorts of serious injuries and lasting consequences such as eye trauma and burns. It's important to take time to learn how to stay safe and happy in the presence of fireworks companies.
