

## **Pervading Psychological Approaches in Teaching Communication skills to Non-Native students.**

Communication skills target appropriate understanding with groups of People or with single person. It always appreciates wide range of vocabulary to listen and speak effectively ; to present your ideas clearly through speaking and writing. Verbal communication comes in first priority Hence applying some psychological freedom needed there to attain the level of understanding in the process of learning communication. skills. This research may ask the question what is the need of adding psychological approach when already some elementary techniques present there, such as i) Role play 2). Watching films 3) Introspection 4) Turn-Talking etc. Here we can see the aspect following psychological consent that a recent study by Dr. Thomas Bak a lecturer at Edinburgh school of philosophy, Psychology and Language sciences clarifies that young adults proficient in two languages performed better on attention test and had better. concentration than people who speak one language. As a combination of Psychology and learning communication Skill would give better improvement in pertaining the target.
