

Title: A study on Special Children: need for Individual Education Plan and Individual Progress Report for their transfer from one school to another.

Overview: Maintaining Individual Education Plan and Individual Progress Report on special children condition and their education based on their disorder and methods practiced by their trainer is a must for their progress.

Individual Education Plan is developed based on a child condition and how he or she is trained in accordance with their condition.

Individual progress report is developed based on the child's development phase in accordance with their condition.

This individual education plan and progress report is vary essential for special students when they are transferred from one special school to another special school. This helps the trainer to understand better about their progress and methods followed by their previous trainers.

Methodology: This study will be qualitative in nature. Interviews with the trainers based on the individual student's condition and their family is done, analyzing their individual education plan and progress sheet will be added in the study.

Outcome and Impact: This study will help policy makers and special schools to maintain records on every individual special student and their progress. Helps policy makers to understand the importance of these practices in special schools and to mandate the maintenance of these record throughout their life time in special schools and by their parents like a medical report maintained for each medical patient.

Title: An Open Study on Child and Adolescent Anxiety and Depression Cause and Effects.

Overview: Anxiety and Depression is a major issue that grows into the modern society. A developing nation like India faces an intense issue because of anxiety and depression among children and adolescents who plays the major role in the nation's development.
